- kakanyero142@gmail.com
- <https://github.com/kakanyero>
- 3456 kampala, Uganda

SKILLS

- Programming Languages: Java, Python, JavaScript, C/C++, Kotlin
- Web Development: HTML, CSS, React.js, Node.js, Express.js
- Database Management: SQL, MongoDB
- Frameworks & Tools: Spring Boot, Django, Git, Docker
- Agile Development Methodologies
- Problem-solving and Analytical Skills
- Strong Communication and Collaboration Abilities

EDUCATION

Bachelor of information technology and computing

Kyambogo universty

2021-2024

SOFTWARE ENGINEERING

ALX Africa

2023-2024

LANGUAGES

English
Kiswahili

PROFILE

Dedicated skilled and innovative software engineer with a passion for developing robust and efficient software solutions. Experienced in full-stack development, with expertise in Python, JavaScript, and related technologies. Proven track record of delivering high-quality software products in fast-paced environments.

WORK EXPERIENCE

software developer

kyambogo univrsity internee

2022-2023

- Collaborated with cross-functional teams to design, develop, and deploy scalable web applications using Java and Spring Boot framework.
- Implemented RESTful APIs to facilitate seamless communication between front-end and back-end systems.
- Utilized React.js and Node.js to build intuitive user interfaces and enhance overall user experience.
- Conducted code reviews and implemented best practices to ensure code quality, performance, and security.
- Contributed to the optimization of database queries and schema design for improved efficiency and reliability.

Android developer

ntellectitch Ntinda Uganda

2023

- Developed and implemented machine learning models to extract valuable insights from large datasets, contributing to data-driven decision-making processes.
- Collaborated with cross-functional teams to gather and analyse requirements for Android app development, ensuring alignment with business objectives.
- Designed and implemented innovative features for the Android application, focusing on user experience and functionality.
- Utilized data visualization tools to present complex findings in a clear and understandable manner for stakeholders.
- Conducted data pre-processing, cleaning, and feature engineering to enhance the quality of input data for machine learning algorithms.

software developer

Innovation Village

- Assisted senior engineers in developing and maintaining web applications using Django framework and Python.
- Participated in the design and implementation of database models and schema using SQL and MongoDB.
- Collaborated with QA engineers to identify and resolve software defects and ensure product quality.
- Conducted research on emerging technologies and proposed innovative solutions to enhance existing systems.
- Provided technical support and assistance to clients during the implementation and deployment phases.
